

ANSHUL SINGH

+91-9324780331 | as22791@nyu.edu | LinkedIn | New York City, USA

EDUCATION

New York University (NYU Courant) — New York, USA
Master of Science in Computer Science

Aug 2026 – May 2028

Indian Institute of Technology (BHU) — Varanasi, India
Bachelor of Technology in Engineering | GPA: 8.98/10

Aug 2019 – June 2023

EXPERIENCE

Myntra — Walmart subsidiary; India's largest fashion app (70M MAU)

Bangalore, India

Senior Software Engineer

Jan 2026 – July 2026

- **Armitage Performance Platform:** Architected a cross-platform mobile performance monitoring system with Kotlin Multiplatform and React Native JSI to measure real-time UI/JS FPS, CPU, memory, and launch vitals across iOS and Android, with a device-tier scoring engine achieving **10.5%** deviation from Xcode Instruments at only **1–2%** CPU overhead.
- **Mobile Platform Modernization:** Migrated Android infrastructure to **API 35** with Edge-to-Edge and **16KB** page-size support; upgraded React Native from **0.73.11** to **0.78.3** with **React 19**, and contributed to New Architecture migration.
- **Categories Page Revamp:** Led Layout Engine-driven frontend for the category browsing experience, improving responsiveness, enabling scalable experimentation, and reducing navigation steps to PDP on high-traffic shopping journeys.

Software Engineer

Sept 2024 – Dec 2025

- **Product Listing Page Migration:** Migrated PLP to Myntra's Layout Engine for a scalable widget-driven architecture with half-card and M-Now quick-commerce integrations, reducing latency by **30%** and lifting RPU/conversion by **3%**.
- **Cold Launch Optimization (Android & iOS):** Cut Android cold launch by **45%** (**2.7s → 1.4s**) and Home TTFD by **20–25%**; improved iOS cold launch by **23%** (**970ms → 750ms**) and Home TTFD by **30%** via parallelized startup and reduced I/O.
- **Patch Bundle Rollouts:** Integrated Android Patch Bundle Rollouts for React Native diff updates, shrinking update payloads from **14MB** to **<1MB** and improving rollout reliability while lowering user data consumption.
- **Dynamic App Icon & Splash:** Built a remote-configurable system for sale-event app icons and splash screens, driving a **5–8%** increase in organic traffic share through consistent brand identity across key journeys.
- **Halfcard Service:** Designed a Layout Engine modal system that triggers contextual half-cards on scroll/load with frequency capping, interval scheduling, and continuous A/B testing for engagement experiments.

FlyFin AI — AI tax tools for US consumers

Bangalore, India

Software Engineer

July 2023 – Sept 2024

- Built an automated OCR document upload pipeline with AWS Textract for complex tax forms, streamlining end-to-end filing workflows and driving a **4x** increase in successful tax filing completions.
- Refactored the expense classification engine into a Celery and RabbitMQ distributed system for horizontal scaling, cutting processing time for **1K** expenses by **87%** (**12 mins → 1.5 mins**).
- Developed PDF review tools (bounding boxes, zoom, rotate) with Canvas API and Web Workers to offload heavy client-side work and speed up tax document verification for ops teams.

Udaan — India's largest eB2B platform (20M+ orders/year)

Bangalore, India

Software Engineering Intern

May 2022 – July 2022

- Optimized Apache Solr indexing by analyzing query patterns and restructuring schema fields, reducing search latency and improving retrieval efficiency for high-volume catalog queries.
- Strengthened the CQRS sync pipeline with an automated cleanup cron to purge inactive product listings and keep the write DB and read-optimized secondary store consistent.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, Kotlin, Objective-C, Swift, SQL (PostgreSQL), MongoDB

Frameworks & Libraries: React Native, React.js, Django, Node.js

Tools & Platforms: Git, Android Studio, Xcode, VS Code, AWS (Textract), Celery, RabbitMQ, Apache Solr

ACHIEVEMENTS

- Led IIT BHU Cisco thingQbator student organization, defining strategic roadmaps and managing cohort initiatives to grow the campus startup ecosystem.
- Represented the institute football team; secured a silver medal and Best Player honors at the Annual Sports Fest of IIT.
- Achieved Global Rank **1386** in Google Kick Start 2021 Round D.
